

Top 10 soft skills in IT

According to Doyle (2018) IT professionals need to interact with customers, colleagues and managers in order to manage departments and convey their ideas. Although the importance of technical skills in IT positions can't be denied, employers find soft skills important as well. The following 10 soft skills are most asked for in IT jobs:

1. Communication
2. Creativity
3. Determination
4. Flexibility
5. Leadership
6. Listening
7. Mentoring
8. Negotiation
9. Presentation
10. Teamwork
